CONFIDENTIAL

23 March 1949

MEMORANDUM FOR RECORD

1. On 22 March 1949 Lt. Colonel Dickson, Plans and Operations, Department of the Army, telephoned and solicited my views on the reactivation of a Navy broadcasting activity in the Far East in which the Department of the Army and Air Force had offered no objection. I advised Colonel Dickson that I would instruct my Chief Engineer to contact him and discuss the project, after which I would give him the official reaction.

2. On 23 March 1949 FBIB Chief Engineer, [] conferred with Colonel Dickson with reference to this project and subsequently advised me as follows:

25X1

a. The subject project, covered by JCS 1250/7, dated 15 March 1949, regarding Navy rehabilitation of a Japanese very low frequency transmitting station, will create no foreseeable interference to CIA monitoring activities on Okinawa.

b. The high frequency and very high frequency transmitters to be used in conjunction with this very low frequency transmitter will be of such low power and, being located at [] (near Nagoya), Japan, will be sufficiently far away to create no foreseeable interference to CIA monitoring activities on Okinawa.

3. On the afternoon of 23 March 1949 Chief, FBIB, notified Colonel Dickson by telephone that FBIB interposed no objection to the proposed project as presented to []
